Mini-Project: Double It

Create a program that displays all the powers of 2 in a series (1, 2, 4, 8, 16, 32 ...).

Suggested Prerequisites

- Programming Intro

Specification

- Display the numbers one by one to the Serial Monitor.
  - Each number should occupy a new line
  - The delay between each number should be about 500 ms so that we can see it.
- Use the int data type, and don’t worry about exceeding the maximum value.
