

Paper: Due Mon Apr. 8

Explain, in some detail, the different strategies one can use for reducing the fuel consumption in automobiles. Need solid scientific details for each strategy-what it is, how it works, how much improvement in fuel efficiency it can achieve..

The paper should be 1.5 spaced, Times New Roman 12 font. 15-20 pages, including figures. All papers have an abstract on the title page. Figures w/ captions.

Then Introduction to the problem and .

Then description of various technologies for powering an automobile, and how each can be improved.

Then economic feasibility of various technologies.

Then discussion

Finally, conclusion.

Then a reference section. References are consecutive in the body of the paper, indicated by [1],[2] etc. *IEEE reference style* Everything has to be referenced. You did not invent any of these.
